

# MONEY SAVING • TIME SAVING NUMERICAL CONTROL TAPE APPLIANCES

Tape-Stor appliances were designed and developed specifically for easier, more economical processing of or correcting tapes used in numerically controlled machines. Each is simple to operate, requires but a small investment to own and will save you many dollars now lost in machine down time while waiting for new tapes to be made.

## TAPE PUNCHER

(Patented)

**CARRYING CASE** Handsome, sturdy wood construction. Protects your Puncher at all times... provides easy portability. Price \$35.00 F.O.B. Minneapolis.

- Saves Machine Down Time
- Makes tapes for any numerically controlled machine
- Corrects tape errors
- Economical to own
- Simple and fast to operate

The Tape-Stor Tape Puncher is a versatile, hand operated machine used for punching new tapes and for correcting errors on existing tapes. Makes EIA standard one inch 8 track tape, 20 signals or less. Punches paper and mylar tapes. The Tape-Stor Puncher requires no special skills to operate... the manually set spindle is dialed to desired signal and operating handle is depressed to punch tapes. Punch guides are available for any make of machine tool. Specify machine make and model when ordering. Occupying about one square foot of space and weighing only 11 pounds, this machine can be used anywhere in your plant where needed — bench department, inspection department or model shop. Tape-Stor Tape Puncher is ruggedly built with punches and die sections made of air hardened tool steel and nitrided. One year guarantee. Price including one punch guide \$510.00 F.O.B. Minneapolis. Additional punch guides available at \$62.50 each F.O.B. Minneapolis.
